EDUCATION

B.Tech, Computer Science & Engineering – Pranveer Singh Institute of Technology, Kanpur — CGPA: 8.5/10 — 2022 – 2026
Senior Secondary (XII) – CBSE Board — 84% — 2022
Secondary (X) – CBSE Board — 85% — 2020

EXPERIENCE

Amazon — *Bengaluru, India*
Software Development Engineer Intern — Jan 2026 – Jun 2026

- Shipped an **LLM-powered Website Summary banner** (React + Java) used by 200+ engineers daily, cutting website health investigation time from 3–5 minutes to under 5 seconds.
- Built a **Funnel Loss visibility** feature (Athena, Java, React) surfacing per-stage entity drop-off across 7 pipeline stages with error code distribution and pass-through metrics, giving QA, PM, and Ops teams self-serve pipeline debugging without engineering dependency.
- Owned the **WorkflowInputSchema** feature end-to-end across Smithy, DynamoDB, AWS AppConfig, Lambda, and React (RJSF), cutting oncall Recovery workflow onboarding from 2–3 hours to minutes for 5–6k workflows per call.
- Grew dashboard KPI coverage from **2 to 33 metrics** across AWS CDK, Scala/Spark, Elasticsearch, Java Lambda, and React, giving the SDO program full health visibility for 200+ daily users.
- Added **runId-based trace linking** between primitives and milestones via React Context, cutting cross-primitive debugging from 5–7 minutes to under 30 seconds.
- Unblocked **6 stalled CI/CD pipelines** (blocked up to 39 weeks) by resolving EOL dependency violations, orphaned CloudWatch alarms, Kinesis API mock regressions, and retry timing bugs across Java and Scala services.

Turing — *Remote*
Python Developer | LLM Trainer — Oct 2025 – Dec 2025

- Evaluated GPT-4, Claude, and Gemini outputs against structured prompts to benchmark reasoning accuracy, consistency, and hallucination rates across adversarial and edge-case datasets.
- Built training datasets and ran iterative prompt evaluations that improved LLM instruction-following quality through systematic feedback cycles.

Outlier AI — *Remote*
AI Trainer & Software Engineer | LLM Trainer — Jun 2025 – Sep 2025

- Evaluated, compared, and corrected LLM outputs, writing complex technical prompts to assess and improve model accuracy, logic, and safety.
- Conducted code reviews of AI-generated scripts, debugging and optimizing them for correctness and quality.
- Applied **RLHF** methodologies to refine Large Language Model behavior and reliability.

PROJECTS

Inventory Management System | Django, React.js, PostgreSQL, JWT, Auth0, REST APIs — Sep 2025

- Designed a full-stack inventory platform with role-based access control using JWT and Auth0, supporting admin and staff tiers with token refresh and session blacklisting.
- Built scalable REST APIs with Django and PostgreSQL to manage inventory, orders, and suppliers, cutting manual stock reconciliation effort by 60% through real-time update workflows.

AI Document Summary Assistant | Flask, Hugging Face Transformers, PyMuPDF, Tesseract OCR, Docker — Jan 2025

- Built an AI-powered summarization system processing scanned and digital PDFs using OCR and Transformer-based NLP models, cutting manual document review time by 70%.
- Containerized the REST APIs via Docker for document ingestion and metadata extraction, bringing deployment setup down from hours to under 5 minutes across environments.

Multi-Factor Authentication System | React.js, Node.js, MongoDB, JWT, bcrypt, TOTP — Oct 2024

- Built a secure MFA system using JWT, bcrypt, and TOTP, with encrypted credential storage, session validation, and protected route authorization.
- Added facial-recognition-based auto-lock/auto-unlock as a secondary authentication layer on top of TOTP.

SKILLS

Languages: Java, Python, C++, JavaScript, TypeScript, SQL
Cloud & Backend: AWS (Lambda, DynamoDB, Athena, AppConfig, CDK, CloudWatch), Spring Boot, Node.js, REST APIs, Microservices
Frontend: React.js, Next.js, RJSF, HTML5, CSS3
Data Stores: PostgreSQL, MySQL, MongoDB, Elasticsearch, Spark
Developer Tools: Git, Docker, GitHub Actions, CI/CD, Linux
Core CS: Data Structures & Algorithms, OOP, System Design, DBMS, Operating Systems

ACHIEVEMENTS & CERTIFICATIONS

- **Amazon ML Summer School 2025** – Selected among Top 200 students nationwide.
- **Google Girl Hackathon 2025** – Semi-Finalist, Top 2.5% of participants nationwide.
- **LeetCode & HackerRank** – Solved 800+ DSA problems | Max Rating 1700+ (Top 8% globally) | 5-Star DSA Badge.
- **Certifications** – AWS Cloud Practitioner Essentials | HackerRank Python (Basic) | HackerRank SQL (Intermediate).
- **Algorithmic Club** – President; led a 200+ member technical club, organized coding contests and workshops.
